

Project Design Phase-II

Data Flow Diagram & User Stories

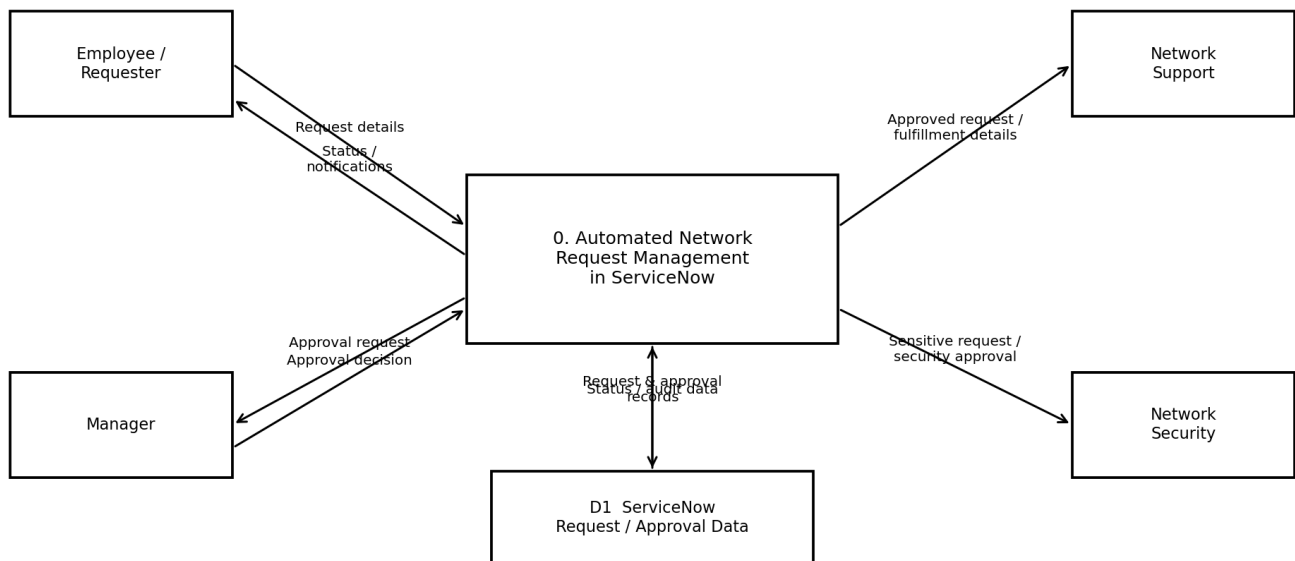

Date	28 September 2026
Team ID	
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) shows how information enters, moves through, and leaves the Automated Network Request Management system, including request submission, approvals, security review, fulfillment, notifications, and storage of request and approval data.

DFD Level 0 – Automated Network Request Management

Data Flow Diagram - Level 0

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee / Requester	Network Request Submission	USN-1	As an employee, I can select a network service such as VPN, Wi-Fi, IP Whitelisting, or Firewall Access.	I can select one valid request type and continue with the relevant form fields.	High	Sprint-1
Employee / Requester	Network Request Submission	USN-2	As an employee, I can enter employee details, department, application/resource, access duration, and business justification.	Required common fields are validated before submission.	High	Sprint-1
Employee / Requester	Dynamic Request Form	USN-3	As an employee, I can see only the fields relevant to the selected request type.	VPN, Wi-Fi, IP Whitelisting, and Firewall-specific fields appear conditionally and required fields are enforced.	High	Sprint-1
Employee / Requester	Request Tracking	USN-4	As an employee, I can submit my network request and receive a request number.	A Request/RITM is created and the submitted details are stored in ServiceNow.	High	Sprint-1
Manager	Manager Approval	USN-5	As a manager, I can review and approve or reject a network service request.	The manager receives an approval request with the relevant request information.	High	Sprint-2
Manager	Manager Approval	USN-6	As a manager, I can provide an approval decision that is recorded in the request history.	The approval state and approval history are updated after the decision.	High	Sprint-2
Network Security	Security Approval	USN-7	As a Network Security member, I can review sensitive IP Whitelisting and Firewall Access requests.	Sensitive requests are routed for security approval after manager approval.	High	Sprint-2
Network Security	Security Approval	USN-8	As a Network Security member, I can approve or reject a sensitive network request.	The security decision is recorded and the workflow continues according to the decision.	High	Sprint-2
Network Support	Fulfillment	USN-9	As a Network Support member, I can receive approved network requests assigned for fulfillment.	Approved requests are routed to the Network Support team with the required request details.	High	Sprint-2
Network Support	Fulfillment	USN-10	As a Network Support member, I can update the request while completing the requested access.	The fulfillment status and relevant work notes are recorded in ServiceNow.	High	Sprint-2
Employee / Requester	Notifications	USN-11	As an employee, I can receive notifications when my request is submitted, approved, rejected, or completed.	Notifications are generated for the relevant request status changes.	Medium	Sprint-3
Administrator	Audit & Reporting	USN-12	As an administrator, I can review request, approval, and fulfillment history.	The system maintains an auditable record of request and approval activity.	Medium	Sprint-3
